

Holiday NICU BOOK DRIVE

NOV 1-14

November is National Family Caregivers Month (NFCM)

Rook's Books Publishing, LLC is partnering with

Riley Hospital for Children and St. Vincent Women's Hospital

to deliver children's books to families in each NICU this Holiday Season.

Studies show that half of babies with low birth weight, who reside in the NICU, are more likely to develop language delays later in life. Frequent exposure to auditory experiences during their stay in the NICU and early in life, assists in language development. In such a high-stress environment for parents, reading to their child in the NICU also reduces some of the anxiety experienced.

Please consider donating to the Rook's Books Holiday NICU Book Drive.
